

CONVENTIONAL POSITIONER

CAPACITY FROM 1T TO 35T

AMIN
AMIN MACHINERY PVT. LTD.

Conventional Positioners,

provide steel fabrication shops with the most up-to-date equipment for placing bulky fabrications in the 'downhand' position in the shortest possible time without the use of cranes and manpower.

Positioners are built to give long trouble-free service and include all necessary built-in safety features.

The positioners tables rotate at accurate and constant variable speeds and tilt through 135° with a high c.o.g. load rating. Positioners can be supplied for interfacing with Column and Boom Manipulators.

Features :

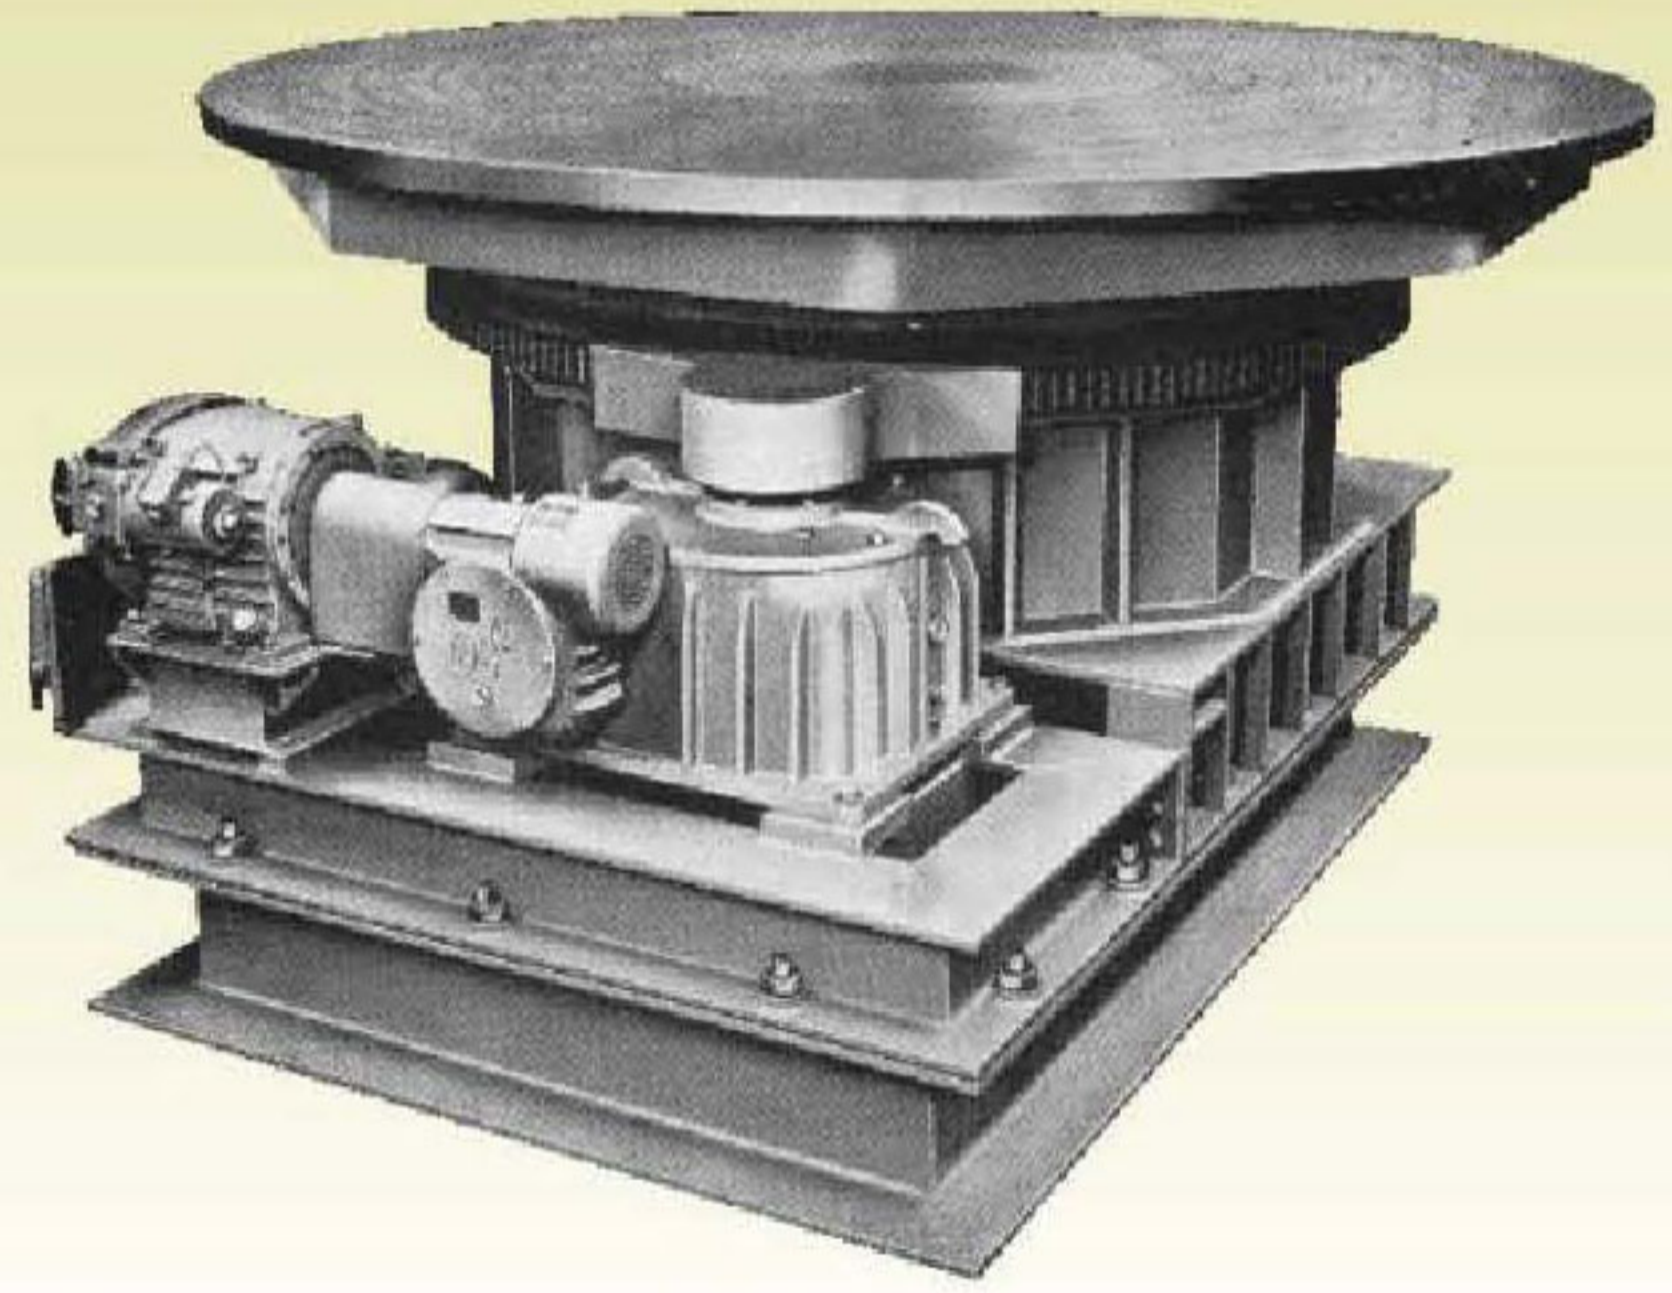

- Robust all steel fabrication.
- Variable or single speed table rotation through 360°
- Square or round table as desired, with 'T' slots and concentric rings to facilitate fast and accurate alignment and clamping.
- Table tilting mechanised through 135°, including limit switches to prevent over-run.
- Centre spindle carried in sealed pre-loaded Timken bearings or, depending on capacity, large diameter crossroll bearing provided.
- Accurate machine cut steel gears.
- Efficient built-in earthing. Totally enclosed electric motors including electromagnetic brakes.
- Pendant remote push button controls for all movements, together with speed potentiometer

Optional Equipment :

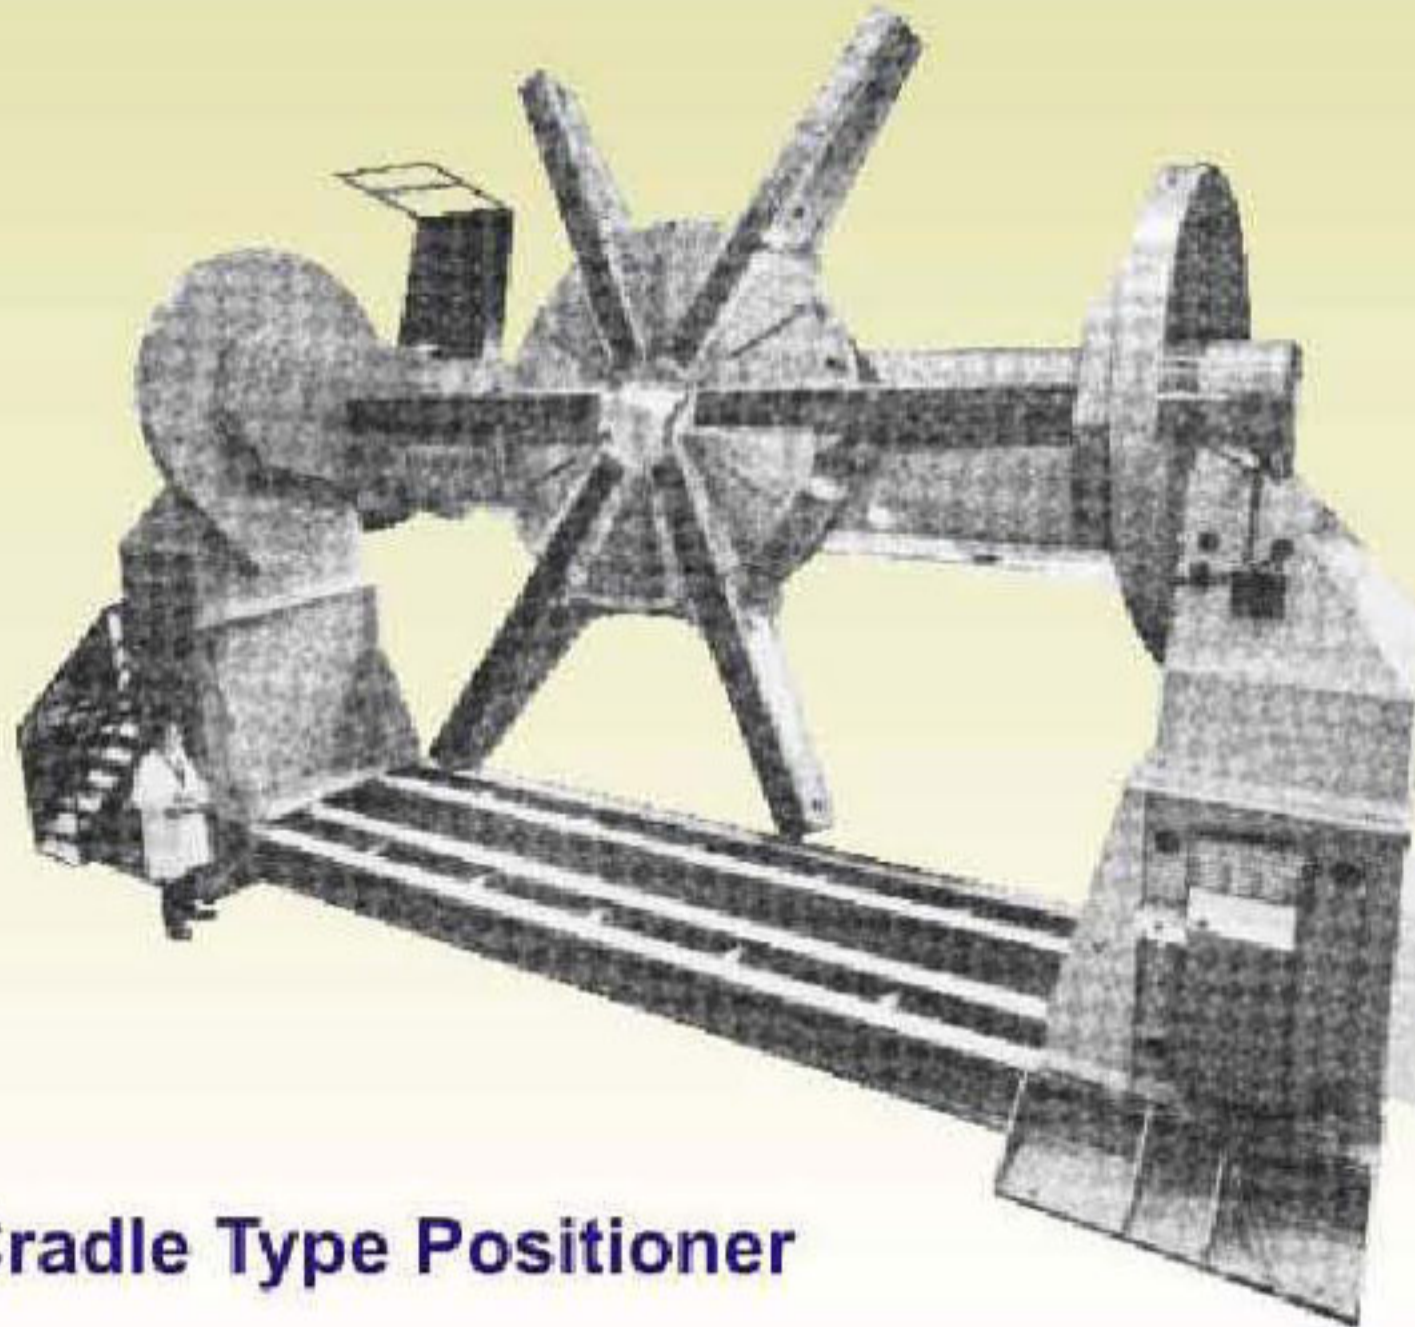

- Table rotation Speed Indicator.
- Diameter Selector.
- Cradle for manual height adjustment.
- Detachable outriggers.
- Foot Switch.
- Extension Arms

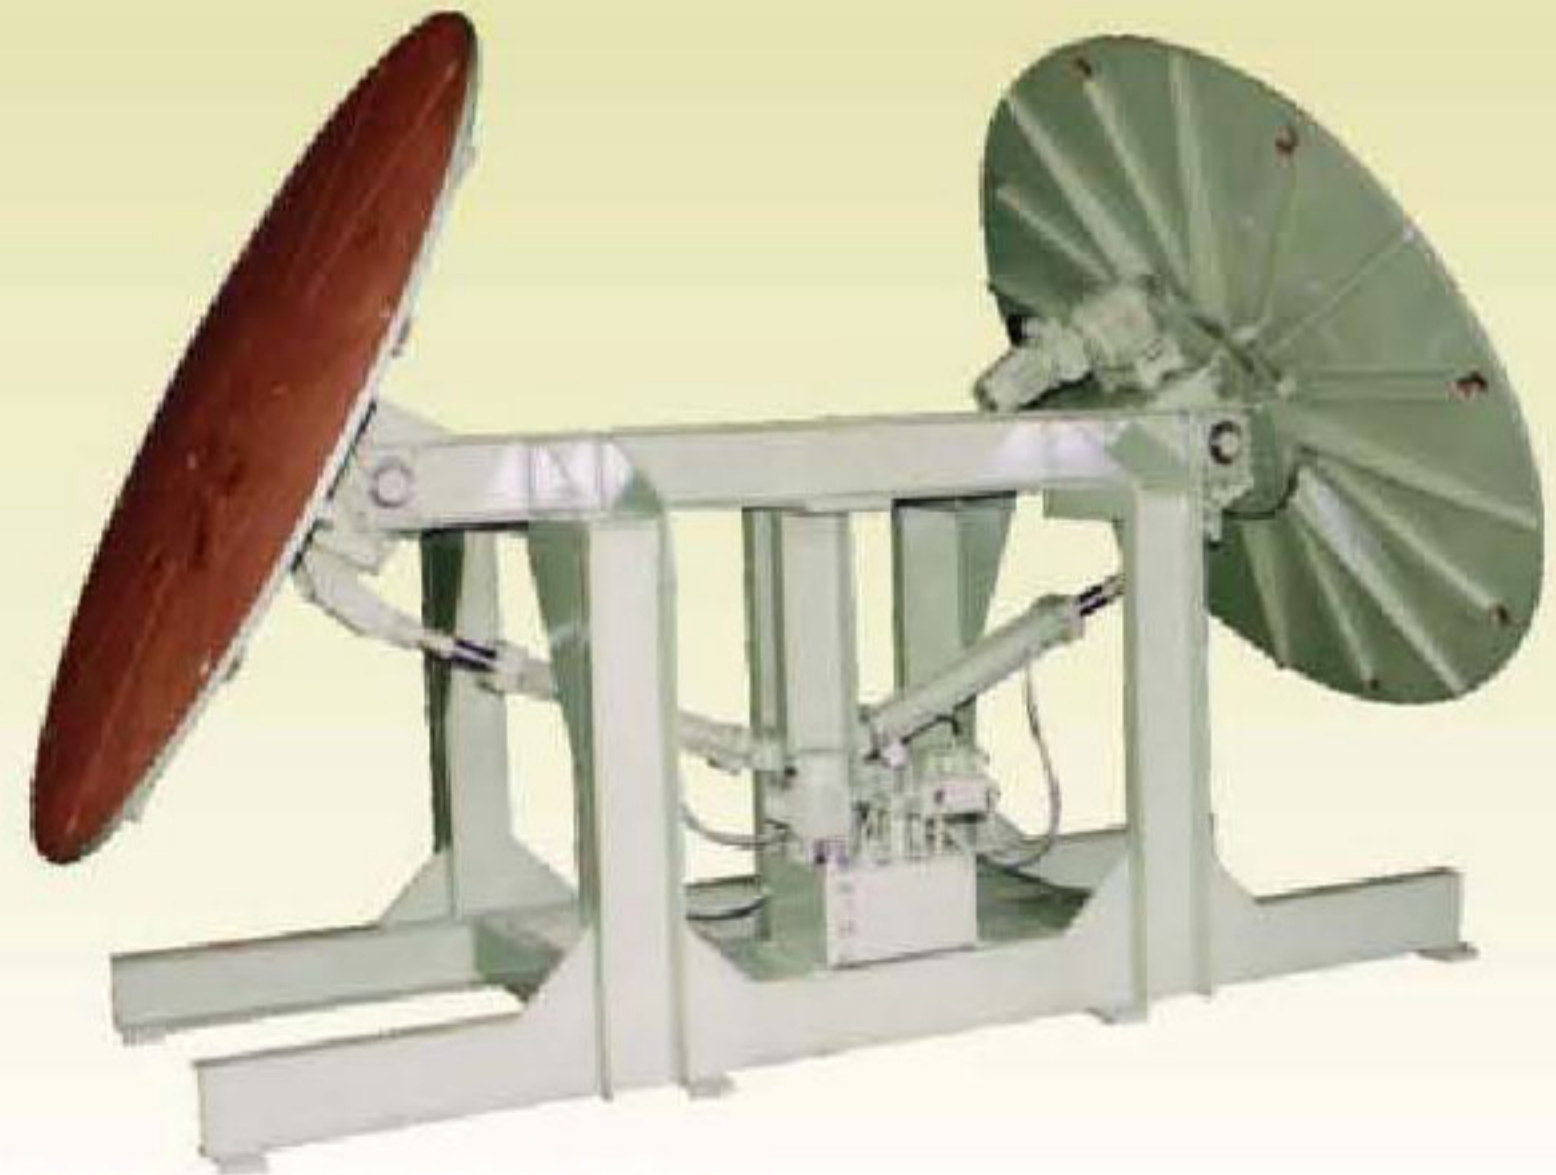

Rotiting Welding Positioner

Horizontal Turntable

Cradle Type Positioner

Twin Table Positioner
